

SkillBuilder **CORE**

COMPETENCY LEARNING SYSTEM

The SkillBuilder CORE Competency Learning System empowers organizations to develop the CORE transferable competencies required for effective job performance.

PERFORMANCE-BASED EMPLOYEE DEVELOPMENT

The ultimate objective of workplace learning initiatives is to improve job-related performance:

- Pre-learning assessment focuses learner attention
- Learning develops skills and competencies required for organizational success
- Post-learning assessment reinforces and validates learning acquisition, enabling ROI metrics of learning initiatives that can be compared to pre-assessed levels

SKILLBUILDER CORE COMPETENCY LEARNING SYSTEM

iLearn Solutions' innovative Skillbuilder CORE Competency Learning System incorporates the cycle of assessment and learning to support the development of critical organizational competencies:

- iTests identify CORE competency strengths and gaps
- SkillBuilders develop competency in gap areas
- iTests validate learning and competency attainment

SKILLBUILDER CORE COMPETENCY TEST-TO-LEARN SYSTEM INCLUDES:

CORE Competency Model

30 CORE researched-defined transferable competencies required for effective job performance in any organization.

SkillBuilder

80 SkillBuilders designed to address CORE competency requirements.

iTest

30 iTest assessments designed to objectively measure proficiency in CORE competencies.
