

SkillBuilder

Skillbuilder ecourses bring the unique concept of modularity to job skill learning - enabling organizations to address specific skill gaps with targeted competency-based learning.

Skillbuilders are designed to empower employees to become self-guided and active participants in learning, while improving training results and reducing costly errors on the job.

Improve training results. Reduce costs.

READY-TO-DEPLOY FORMAT

Skillbuilders enable organizations to immediately embark on training initiatives in a cost-effective manner. Ready-to-Deploy Skillbuilders are available in SCORM or AICC compliant formats, easily integrating into any compliant Learning or Talent Management System.

Skillbuilders are Ready-to-Deploy as stand-alone courses or as a complete performance-based employee development package along with our integrated iTest assessments and CORE competency model.

DEVELOPMENT METHODOLOGY

Skillbuilders are designed, developed and validated to emphasize work specific skills and the transfer of application-based learning to on-the-job performance. iLearn Solutions uses a systematic instructional design methodology which incorporates:

- Principles of applied learning
- Analysis of labor-market data
- Extensive job task analysis
- Integration of core practical job requirements

SKILLBUILDER LIBRARY

The CORE Competency Skillbuilder Library covers the most common transferable competencies and job skill categories, including:

- Transferable Work Skills
- Desktop Software
- Customer Service
- Office Skills
- Presentation Skills
- Management and Leadership
- Teambuilding and Teamwork
- Change Management
- Project Management
- Professional Development
