

iTest assessments give organizations and their employees the ability to objectively evaluate their job and career skill strengths and gaps, allowing for more efficient and cost-effective employee development planning.

Our standardized **iLearn-as-iTest** design offers Ready-to-Deploy (RTD) iTest assessments in a variety of formats including: SCORM and AICC compliant packages for integration into virtually any LMS, and QTI format for efficient import into more robust assessment engines.

Over 500 skill and competency-based assessments

READY-TO-DEPLOY ASSESSMENTS

Assessment content is expensive, time-consuming and resource-intensive to develop. Our iTest Skills Library enables organizations to select the iTest assessments they require for immediate deployment with their employees.

RTD assessments are designed to enable efficient mapping to standard or organization-specific competency models and learning catalogs.

FLEXIBLE MODULAR DESIGN

The modular design of all iTest assessments enables organizations to use, re-purpose and combine assessments in order to address their specific talent management needs.

iTest assessments can be licensed individually or in cost-effective bundled catalog formats.

Organizations can grow their own libraries of effective iTest assessments as their employee development needs evolve.

THE ITEST SKILLS LIBRARY

Our iTest Skills Library covers the most common career and job skill categories, including:

- Desktop Software
- Customer Service
- Finance
- Healthcare
- Human Resources
- Information Technology
- Management and Leadership
- Marketing and Sales
- Office Skills
- Professional Development
- Transferable Work Skills
